

Got Asthma?

Don't Wait. Vaccinate!

Pneumococcal disease is a

deadly infection

that can strike fast.

If you have asthma there is an

increased risk

for hospitalization or death.

Getting vaccinated

is the safest, most effective way to protect
yourself or a loved one with asthma.

Please contact your
health care professional
today for more information.

To find a location near you
for a pneumococcal vaccine, visit the

HealthMap Vaccine Finder

at <http://vaccine.healthmap.org>

For more information and resources about pneumococcal disease, visit:
www.cdc.gov/VACCINES/vpd-vac/pneumo/default.htm
